Product Overview

How to Use

Note: Make sure to clear the kettle thoroughly before first use.

Hot Insulation Performance

Note: Conditions: Open the lid and heat the entire kettle for 30 minutes in an indoor environment with a temperature of 25°C. Then, close the lid and continue to boil for a total of 5 minutes. Pour out the water and immediately add 1.8 L of 100°C water. Close the lid and start timing. Hot Insulation Performance: Water temperature ≥ 90°C after 8 hours. Hot Insulation Performance: Water temperature ≥ 85°C after 12 hours.

Cold Insulation Performance

Note: Conditions: Open the lid and heat the entire kettle for 30 minutes in an indoor environment with a temperature of 25°C. Then, close the lid and continue to boil for a total of 5 minutes. Pour out the water and immediately add 1.8 L of 5°C water. Close the lid and start timing. Cold Insulation Performance: Water temperature ≤ 15°C after 8 hours. Cold Insulation Performance: Water temperature ≤ 20°C after 12 hours.

Care & Maintenance

After the kettle is used to contain beverages other than water, it is recommended to boil water in the kettle and rinse it thoroughly.

Before cleaning, turn a standard 220V power outlet off and unplug the kettle. Do not immerse the kettle body in water or wash it under running water.

Clean the kettle body with a damp cloth. Use a soft cloth or brush dipped in a mixture of baking soda and water to clean the inside of the kettle. Rinse thoroughly with clean water.

Do not use abrasive cleaning products such as steel wool, abrasive sponges, or strong chemical cleaners.

Descale the kettle regularly to maintain its performance and appearance. Use a descaling product and follow the manufacturer's instructions.

Precautions

- Kettle cord is connected to the base and cannot be removed. Do not pull the cord forcefully or bend it excessively.
- Do not use the kettle if the cord, plug, or kettle body is damaged.
- Do not use the kettle if the lid is not properly closed.
- Do not use the kettle if the lid is missing.
- Do not use the kettle if the spout is blocked.
- Do not use the kettle if the handle is damaged.
